

# HOP REPORT

## MONTH - APRIL

YEAR	2014	2013	30-years average
avg. temperature	10,9	8,9	8,5
precipitation	61,6	21,6	32,0
	Day	Value	
max. precipitation	28.4.2014	23,4	mm
min. temperature	17.4.2014	-4,2	°C
max. temperature	07.4.2014	23,3	°C

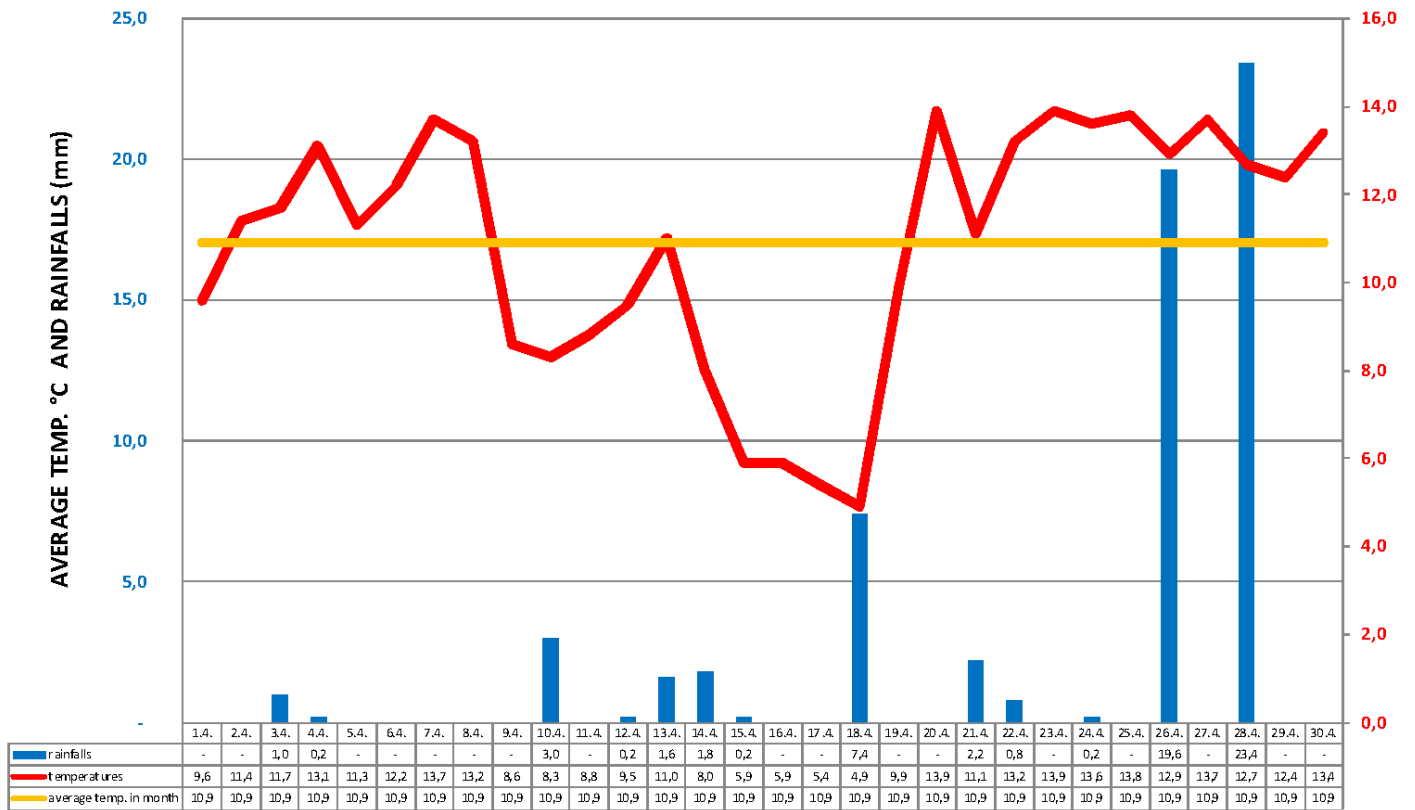

Comments	<p>April was above average as to temperatures and precipitation compared to 30-years average. Significant precipitation of local character occurred at the end of the month. The course of weather in April was suitable for spring works in hopgardens. Because of higher temperatures during March and April the spring works began roughly one week earlier. Wire-stringing and root cut were finished in all hopgardens by the end of April, ca 70% of them are also staked into soil. The height of hopplants was between 0 - 70 cm (depends on time of root cut). Chemical protection against alfalfa snout beetle was effected in some hopgardens. The hopplants are in a good health condition.</p> <p>We estimate an increase of acreage of Saaz variety about 100 – 150 ha compared to last year.</p>
