Comments	<p>April was above average as to precipitation and below average as to temperatures compared to 30-years average. Root cutting was finished in time, wire-stringing was nearly finished and ca 60% of wires were stabbed into soil. Growth stage hasn't started yet, not even in case of early cutted plants because of very cold second half of the month. Acreage of Saaz variety increased compared to last year (according to UKZUZ-Central Institute for Agricultural Supervision and Testing, as on 30.4.2017) Saaz/Saaz +89 ha, total 3390 ha, Saaz/Auscha +15 ha, total 459 ha, Saaz/Trschitz +28 ha, total 472 ha, Saaz/Czech Republic +132 ha, total 4.321 ha.</p>
