Comments	<p>April was above average as to temperatures and below average as to precipitation, both compared to 30-years average. Significant rainfalls came only on 19th of April (12 mm).</p> <p>The course of weather in April was suitable for spring works in hopgardens. In the time of coronavirus, foreign seasonal workers were replaced by students and part-time workers from temporarily closed factories. Root cutting and wire-stringing was finished in time, wire-stabbing is almost completed and training of hops is starting nowadays. Chemical protection against alfalfa snout beetle was effected in some hopgardens.</p> <p>We don't expect increase of acreage of Saaz variety compared to last year. The exact acreage will be informed additionally as it should be announced by UKZUZ within next few days.</p>
