

HOP REPORT 2021

MONTH - APRIL

YEAR	2021	2020	30-years average
avg. temperature	7,2	10,7	9,1
precipitation	6,8	12,8	30,7
	Day	Value	
max. precipitation	12.04.2021	2,4	mm
min. temperature	09.04.2021	-4,6	°C
max. temperature	01.04.2021	23,8	°C

Comments	<p>The month of April was below average in terms of precipitation and temperature compared to the thirty-year average, the temperature was the lowest in the last 80 years. For this reason, the growth phase of most hop plants has not yet begun. The weather was suitable for spring works in hop gardens. Root cutting was finished in time, wire-stringing was nearly finished and ca 60% of wires were stabbed into soil.</p> <p>We do not expect significant changes regarding the acreage, the exact data will be announced by ÚKZÚZ in the forthcoming days.</p>
