Comments	<p>August was above average as to precipitation as well as temperatures. Chemical protection against Downy Mildew, Aphides and Red Spider Mite duly effected. The hop plants are in very good health conditions. The harvest started a bit later than usually, the most of growers started harvesting on 23/8 and later. The harvest will finish on approx. 21/9.</p> <p>Taking into consideration currently available harvest information and analyses we estimate the results of Saaz hops (growing region Zatec) as follows:</p> <p>yield - about 1,2 mt / 1 ha alpha - about 2,8 % as is EBC 7.4</p>
