max. temperature	11.07.2016	34,4	°C

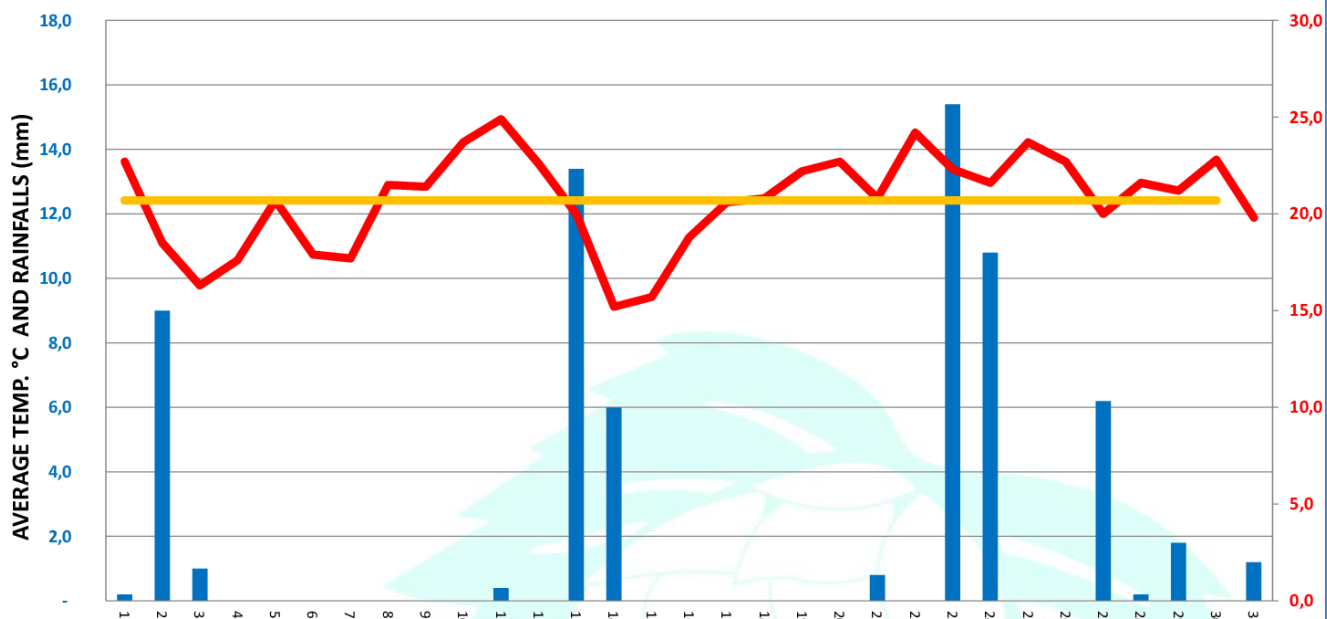

Comments	July was above average as to temperatures and precipitation compared to 30-years average. Hops are in the phase of blossom and cones creation. Chemical protection against aphides, red spider mite and downy mildew was effected. The hopplants are in a very good health condition. The harvest will start between 17th and 20th August. We expect an above average yield.
