Comments	<p>July was above average as to temperatures and below average as to precipitation compared to 30-years average. Locally significant precipitation mostly in form of storms.</p> <p>Almost all hopplants reached the top of trellis by the end of the month. Hopplants are in the phase of blossom and cones creation. Chemical protection against downy mildew, aphides and red spider mite was effected. Hopplants are in a good health condition so far.</p> <p>Taking into consideration current growing situation we can expect an above average yield of Saaz/Saaz - about 1,2 mt/1 ha depending on weather conditions during next 3-4 weeks. The harvest will start on about 20th August as usual.</p>
