

HOP REPORT

MONTH - JUNE

YEAR	2016	2015	30-years average
avg. temperature	18,1	16,4	16,7
precipitation	91,0	85,4	56,0
	Day	Value	
max. precipitation	25.06.2016	20,2	mm
min. temperature	07.06.2016	8,1	°C
max. temperature	24.06.2016	32,4	°C

Comments	<p>June was above average as to temperatures as well as precipitation compared to 30-years average. Most of hopplants already reached the top of the trellis. The hopplants are slowly starting to sprout(side branches). The growth of hopplants is a bit faster compared to last year - about a week ahead - therefore usual beginning of harvest is expected (ca 20th of August).</p> <p>Chemical protection against downy mildew, aphides and red spider mite was effected in time. The hopplants are in very good health condition.</p>
