

# HOP REPORT

## MONTH - MAY

YEAR	2013	2012	30-years average
avg. temperature	12.6	14.8	13.4
precipitation	124.8	25.6	54.0
	Day	Value	
max. precipitation	30.05.2013	27.0	mm
min. temperature	24.05.2013	3.2	°C
max. temperature	17.05.2013	24.9	°C

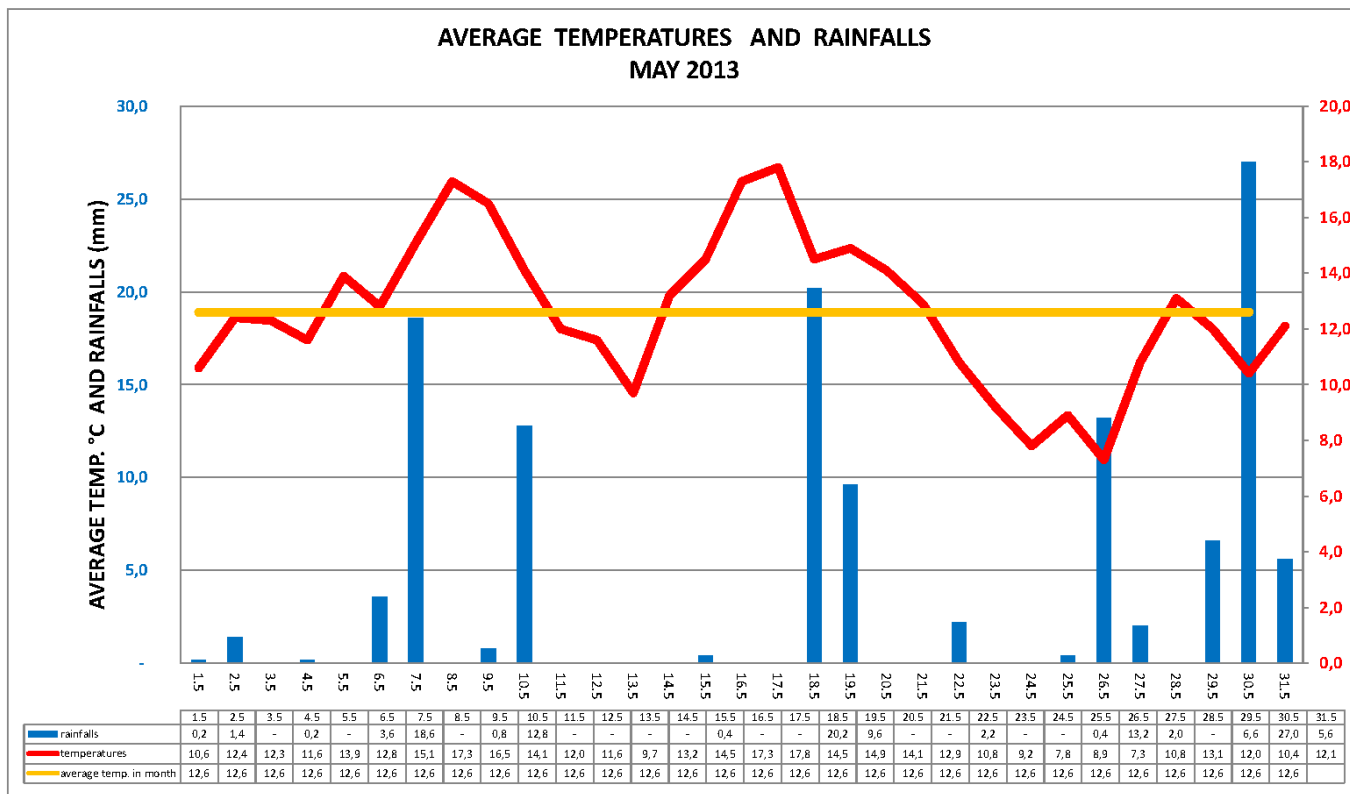

Comments	<p>May was much above average as to precipitation and below average as to temperatures compared to 30-years average. Spring works in hopyards were delayed (mainly at higher locations) because of cold weather. Some hopplants were trained just at the end of the month. There is a big difference in the height of hopplants (0,5 – 3,5 m).</p> <p>Chemical protection against alfalfa snout beetle, hemp flea beetle and downy mildew was effected. The hopplants are in good health condition. Some locations near rivers are endangered by the flood because of heavy rain and high water surface level. We are monitoring situation concerning potential flood attentively.</p>
