

# HOP REPORT 2021

## MONTH - MAY

YEAR	2021	2020	30-years average
avg. temperature	12,1	12,9	14,2
precipitation	97,4	37,4	52,0
	Day	Value	
max. precipitation	13.05.2021	20,8	mm
min. temperature	08.05.2021	1,1	°C
max. temperature	10.05.2021	29,4	°C

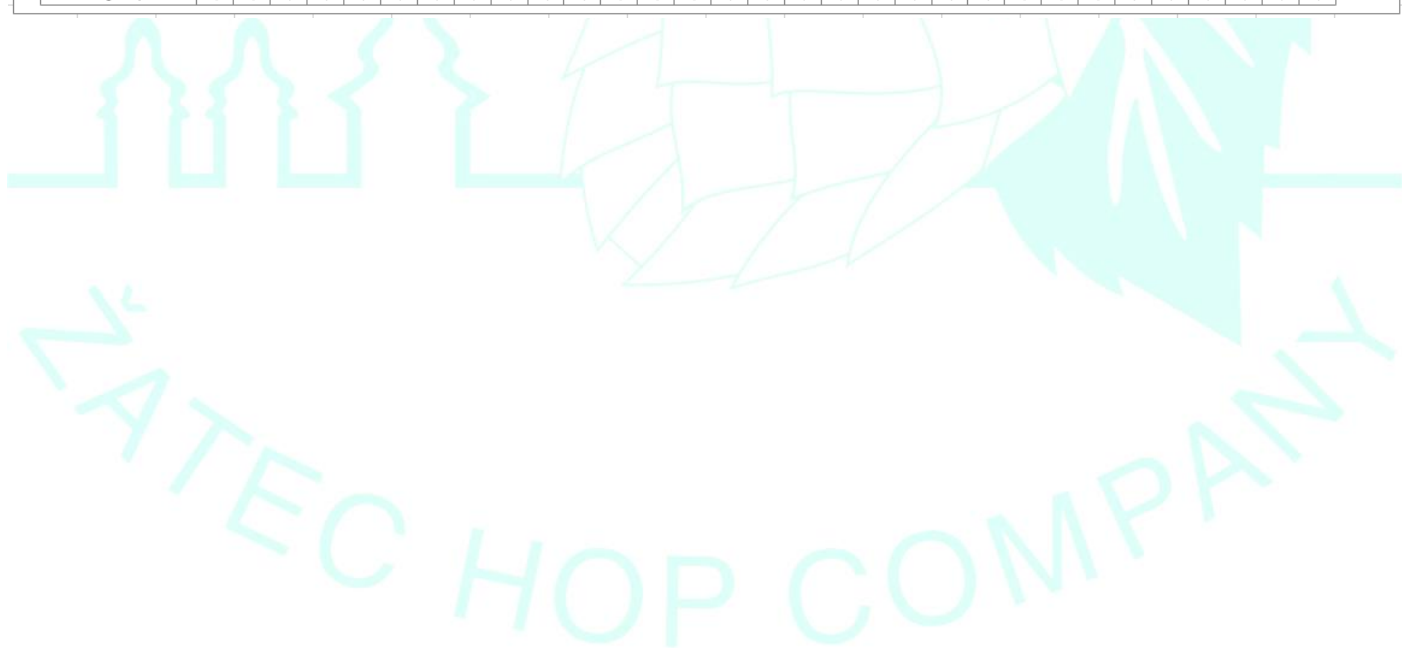

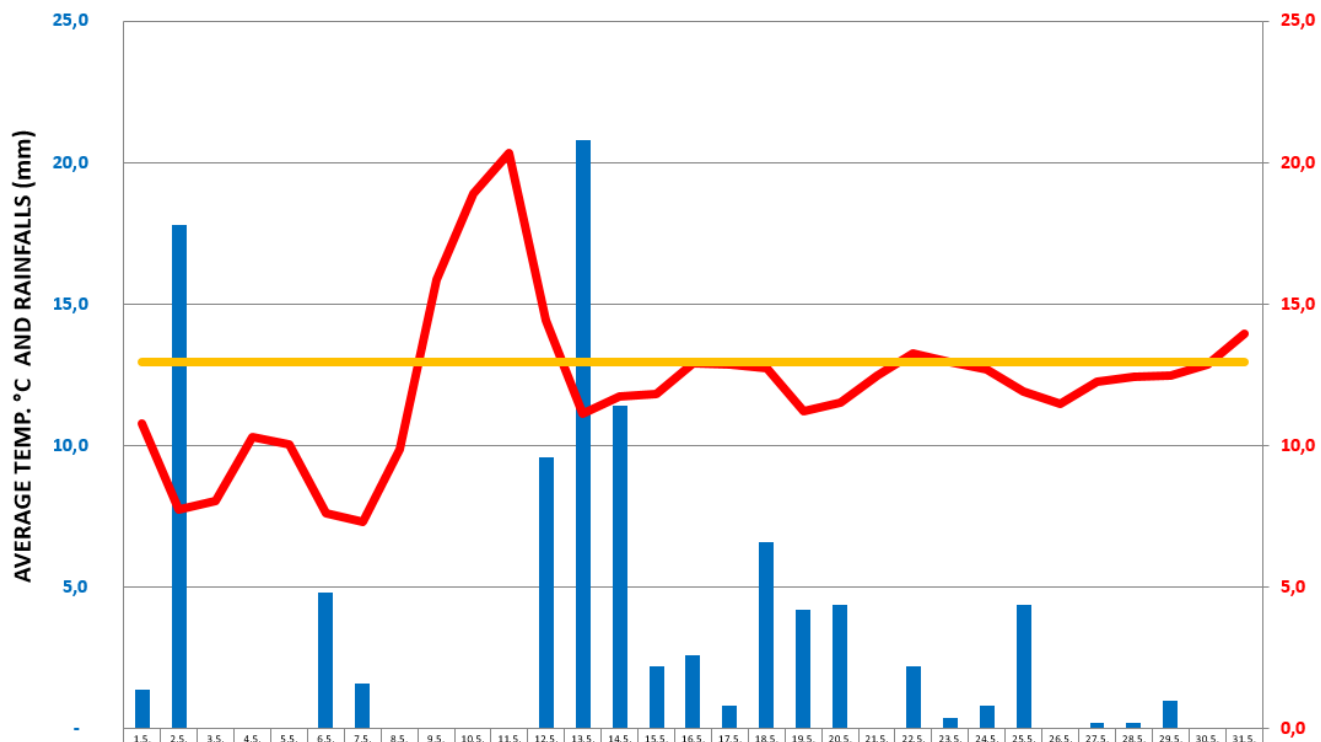

Comments	<p>May was above average as to precipitation and below average as to temperatures compared to 30-years average. Some hop gardens are not trained yet because of colder weather (mostly later cut). The growth of hopplants is two week delayed compared to average year. The height of hopplants is between 0,5 and 2 meters. Chemical protection against downy mildew, alfalfa snout beetle and flea beetle was effected in time (when necessary). The hopplants are in very good health condition. Acreage of Saaz variety decreased compared to last year (according to UKZUZ-Central Institute for Agricultural Supervision and Testing, as on 30.4.2021).</p> <p>Saaz/Saaz -19,5 ha, total 3300,5 ha, Saaz/Auscha +4,6 ha, total 415,2 ha, Saaz/Trschitz -1,9 ha, total 483,6 ha, Saaz/Czech Republic -16,8 ha, total 4.199,3 ha.</p>
